

# Traffic Accidents: Analysis of Death Risk by Age Group in the USA

Summarizing the position of motor vehicle traffic accidents among the top 10 leading causes of death according to age groups in the USA and the significant threat it poses, especially for young and middle-aged demographics.

## High Risk for Children

## One of the Top 5 Leading Causes of Death

Traffic accidents are one of the five deadliest causes across all groups between 1 and 34 years of age.

## Change in Impact as Age Advances

## Risk Continues in Middle Age

Accidents also rank in the top 10 for 35-44 and 45-54 age groups.

## Loses Priority After Age 55

## Loses Priority After Age 55

After age 55, traffic accidents completely drop out of the top 10 leading causes of death.

## CHRONIC DISEASES BECOME PROMINENT

In older ages, causes like heart disease, cancer, and stroke become the main reasons for death.
