

ROAD SAFETY

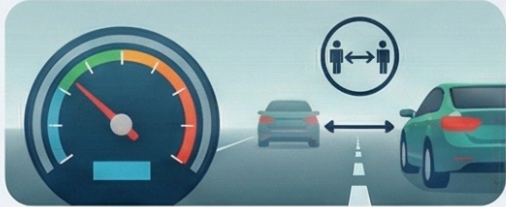

THE INVISIBLE DANGER: "FOG"

MY SAFE ROAD COMPANION

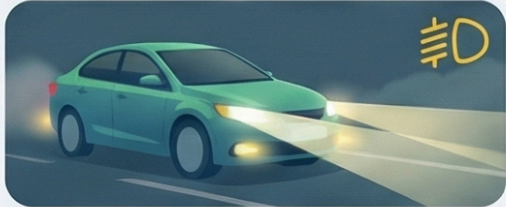

DO'S

Reduce Speed and Increase Following Distance

Drive at a speed where you can stop within the distance you can see and double the following distance.

Use Correct Lights: Low Beams and Fog Lights

Turn on your low beams. If visibility drops significantly, turn on front and rear fog lights.

Focus on the Road and Follow Road Lines

Turn off the radio, listen for sounds, and use road lines as reference.

DON'TS

Never Use High Beams

High beams reflect off the fog, creating a "wall of light" that worsens visibility.

Do Not Use Hazard Lights continuously While Driving

Hazard lights are for sudden dangers or obstacles only, not as a continuous driving signal.

Avoid Sudden Maneuvers and Tailgating

Using the vehicle in front as a guide and unnecessary overtaking is very dangerous.
